## **CELLULITE TREATMENT**

### **Endermologie**

### **Prices from £59.00**

Endermologie is an effective and risk-free technique for controlling cellulite and reshaping the body. Performed with state-of-the-art equipment, the Cellu M6 Endermologie technique manipulates the skin structure by a combination of rolling and aspiration.

This process restructures the skin's connective tissue, stimulates blood and lymph circulation and facilitates the elimination of toxins by triggering the body's normal process for excess fat elimination.

Endermologie extensively tones and firms resulting in smooth skin and a slimmer more refined figure. In addition to the significant reduction of cellulite, the completely natural and non-invasive Endermologie technique also promotes relaxation and well-being.

The safety and sophistication of Endermologie is well proven in its ability to remove cellulite without surgical intervention.

Each Endermologie treatment session is around 45 minutes and should be conducted twice weekly over a seven week period. During each session the patient will wear a specially designed body stocking.

The course of treatment will begin with a full consultation, supported by measurements and photographs taken before and after. Results are dramatic and numerous before and after photographs are available in the clinic

Seasonal treatment with Endermologie could also be part of your decision to embark upon Endermologie treatment in conjunction with the reduction and control of cellulite.

#### Autumn/Winter

Poor Circulation

Sufferers of cold hands and feet, as Endermologie will support the draining and mobilising of the tissue to improve circulation

### Stiffness

As Endermologie can mobilise the tissue, this will relieve tension and potentially relieve areas of inflammation and pain around the lower back.

### Relaxation

Endermologie can also improve the feel good factor and wellness as it improves lymphatic flow, relieving tension and creating a rested balanced and calming feeling.

### Spring

#### Healthy Skin

Will enhance skin tissues and creates a much fresher brighter appearance to your skin.

The treatment will increase blood flow to feed your skin functions with the nutrients it requires and improves fine wrinkles over the surface area of the skin by thickening the epidermis and papillary ridges. Endermologie has also proven to increase collagen level in the skin after only 10 sessions.

#### Tone Skin Tissue

Tones loose skin tissue and redefines the contours of your body along with stimulating fibroblast cells to produce proteins such as collagen and Elastin, resulting in a much enhance skin tone

### Summer

#### Soft Cellulite Water Overload

Drains and mobilises skin tissue structure, this is achieved by the procedure enhancing the lymphatic flow which assists the skin tissues to rid itself of excess fluid.

#### Lymph Flow

Increases metabolic rate exchange, produces a feeling of well being, due to the increased removal of toxins held within the system, which can slow down and tire the system.
