## **EYELASH EXTENSIONS**

### **Jinnylash**

**Price range from £110**

#### **Eyelash Extensions – Explained**

For centuries Women have been on a quest for ways to darken, thicken and lengthen their lashes. Now all of this is possible with the simple and painless Jinnylash semi-permanent treatment. This procedure is so effective that it instantly beautifies you!

Long, dark eyelashes not only emphasise the shape of the eye but also make the eye appear larger and more attractive, creating a beautiful and captivating effect

#### **How is it done?**

This treatment involves attaching between 30-100 synthetic lashes onto the natural eyelashes. This delicate procedure involves attaching a synthetic lash onto one natural eyelash. The end result is natural looking, fuller, longer and more beautiful lashes. This procedure is totally painless.

The synthetic eyelashes bear a very close resemblance to natural lashes and once attached, with the correct care, can last several weeks, until the eyelashes naturally fall out.

The semi-permanent lashes have the characteristic c-shaped curl so even people with lashes that are short, straight or slope downwards can achieve individual lashes that curl upwards, without the need of eyelash perms or dyeing.

#### **Extensive research carried out on this procedure shows the following benefits**

1. Natural looking, lightweight, longer and fuller beautiful lashes that enhance natural beauty, inner confidence and look gorgeous
2. Lasts for several weeks. The average lifetime of a single lash is 90 days. However, factors such as eyelash characteristics, lifestyle and general aftercare will effect how long the lashes last.
3. There is no discomfort to the eye. Eyelashes are made thicker and longer through professional application of an individual synthetic eyelash attached to the natural eyelash and not the skin, with a specially

- formulated bonding agent, each lash being applied directly to the clients individual lash, one at a time
4. Natural looking c-shaped curls that can be achieved even if original lashes are short, straight or slope down.
  5. This product is safe and does not damage the natural lashes. No more mascara, eyelash tint or perming necessary, only regular retouches.
  6. Lashes are available in different colours (brilliant colours such as blue and green which help to accentuate the natural beauty and colour of ones own eyes)
  7. Clients feel relaxed and comfortable throughout the treatment

### **After care**

- Up to 24 hours after treatment the eyelashes must be allowed to dry without anything touching them
- Do not use mascara
- Avoid the use of oils and creams
- Do not rub or pull the eyelashes
- If any single lash becomes crooked all you need to do is hook it on to the next lash along
- Please do not attempt to remove any lashes on your own, seek professional help from the clinic

### **Frequently Asked Questions**

How long does the procedure takes?

- It usually takes between around one and half to two hours

How long does Jinnylash last?

- Lashes can last up to 8 weeks, retouches are recommended every 2-3 weeks, however a lot depends on adequate aftercare

How can I remove the lashes?

- Removal should be carried out by a certified technician, removal is quick and easy and causes no damage to the natural lashes

How can I remove make-up?

- Remove all eye make-up with oil free eye make-up remover using a cotton bud

Can I use mascara after the Jinnylash treatment?

- No, as it may pull natural eyelashes thus losing the c-curl

Do I need to revisit the clinic after the first treatment?

- Yes we recommend retouches every 2-3 weeks
