

No nip, just a lift...

We try injectables for an instant facelift

When it comes to facial skincare there are so many choices to consider. Should we grow old gracefully and enjoy the odd aromatherapy facial? Or take the plunge with a non-surgical facelift? This month Henley Life examines the “injectables” option in the expert hands of The Henley Clinic’s Dr Kate Goldie. Our reviewer visited the local medical clinic and was impressed with their customer service and expertise:

On arrival the Henley Clinic receptionist welcomed me with a coffee and introduced Dr Kate Goldie - Medical Director of European Medical Aesthetics Ltd, one of Europe's largest aesthetic training and support companies.

Dr Goldie reassured me with her in-depth knowledge and hands-on experience. She has great credibility as a renowned trainer in facial improvements via non-surgical methods.

She wanted to give back the scaffolding lost through the ageing process

Her consultative approach allowed me time to clarify that my biggest problems were a permanent frown, wrinkles around the mouth, and a less than defined jawline. With an expert's gaze Dr Goldie explained that she wanted to give back the scaffolding lost through the ageing process. She took the time to really study my face as a whole and it was clear to me that her aim was to achieve a long-term facial harmony and balance. The procedure involved an

advanced injection technique using botulinum toxin to combat the frown lines combined with Radiesse to give the face back the volume. It wasn't painful. It just felt like a few scratches and was well worth it for the outstanding results.

My friends were impressed and commented on how rested I looked. I can see an overall lifting and tightening across the face, as well as diminished lines and wrinkles.

This youthful, fresher look has given me such a huge boost. I'm now looking forward to a big family wedding in the spring with a renewed confidence. Recommended.
